

NorthStar Wealth Management

Consolidated Portfolio Statement & Risk Review

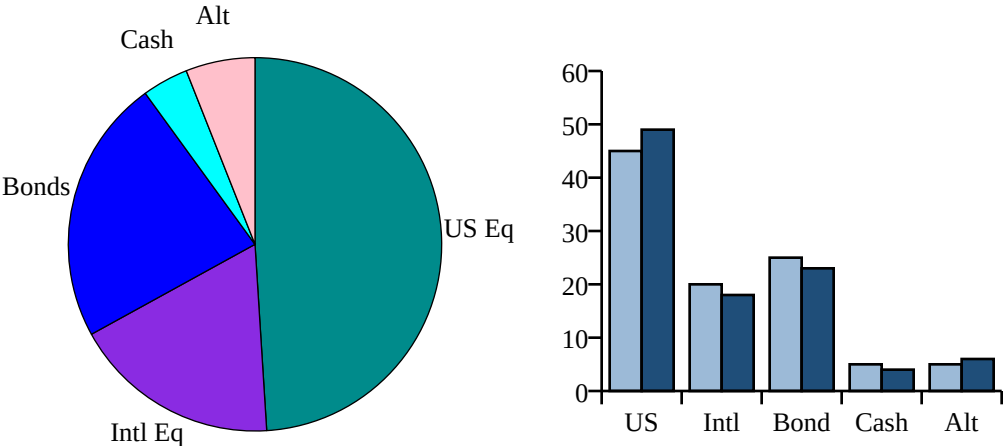

Client: Jay Sample Investor
Statement period: January 1, 2026 - March 31, 2026
Account: 8821-4450
Prepared by: NorthStar Advisory Desk

This synthetic PDF is intended for testing document intelligence, RAG, LangChain tools, and Foundry hosted agent workflows. It is not investment advice and does not contain real client data.

Executive Summary

Portfolio metric	Value	Comment
Beginning market value	\$485,250	As of Jan 1, 2026
Net contributions	\$15,000	Monthly investment program
Investment gain/loss	\$28,820	Includes price change and income
Ending market value	\$529,070	As of Mar 31, 2026
Quarterly return	5.76%	Time-weighted estimate
Estimated annual dividend income	\$8,410	Forward-looking estimate
Portfolio risk level	Moderate Growth	Target 70/25/5 mix

Asset Allocation

Asset class	Target %	Current %	Current value	Drift
US Equity	45%	49%	\$259,244	+4%
International Equity	20%	18%	\$95,233	-2%
Bonds	25%	23%	\$121,686	-2%
Cash	5%	4%	\$21,163	-1%

Alternatives/REITs	5%	6%	\$31,744	+1%
--------------------	----	----	----------	-----

Observation: the portfolio is modestly overweight US equities and underweight bonds. A rebalance of approximately \$21,000 from US equity into bonds would bring the portfolio closer to target risk.

Holdings Detail

Ticker/Fund	Asset class	Quantity	Price	Market value	Unrealized gain/loss	Yield
VTI	US Equity ETF	1,020	\$252.40	\$257,448	\$31,210	1.4%
VXUS	International Equity ETF	1,470	\$64.21	\$94,389	\$6,580	2.8%
BND	US Bond ETF	1,630	\$72.95	\$118,909	-\$2,410	3.5%
VMFXX	Cash/Money Market	21,163	\$1.00	\$21,163	\$0	4.6%
VNQ	REIT ETF	350	\$90.70	\$31,745	\$1,870	3.9%
AAPL	Single Stock	40	\$170.40	\$6,816	\$1,455	0.5%
MSFT	Single Stock	35	\$424.00	\$14,840	\$2,980	0.7%

Concentration and exposure notes

Single-stock exposure is approximately 4.1% of total portfolio value. Technology sector exposure across broad ETFs plus individual holdings is estimated at 31%, which is above a generic balanced benchmark. The portfolio has limited direct exposure to commodities and no direct private equity allocation.

Quarterly Transactions

Date	Type	Security	Amount	Notes
2026-01-05	Contribution	Cash	\$5,000	Monthly automatic investment
2026-01-06	Buy	VTI	\$3,000	Purchased fractional shares
2026-01-06	Buy	BND	\$1,500	Purchased fractional shares
2026-02-05	Contribution	Cash	\$5,000	Monthly automatic investment
2026-02-07	Buy	VXUS	\$2,000	International allocation
2026-03-05	Contribution	Cash	\$5,000	Monthly automatic investment
2026-03-18	Dividend	BND	\$356	Reinvested
2026-03-28	Dividend	VTI	\$420	Reinvested

Risk Review & Scenario Analysis

Risk measure	Current value	Interpretation
Equity allocation	73%	Higher growth potential with elevated volatility
Bond duration	6.1 years	Moderate interest-rate sensitivity
Estimated portfolio beta	0.86	Less volatile than broad US equity market
12-month downside stress	-18% to -24%	Illustrative bear-market range
Liquidity coverage	\$21,163 cash	About 4% of portfolio value
Expense ratio estimate	0.06%	Low-cost ETF implementation

Stress scenarios

Scenario	Assumption	Estimated portfolio impact
Equity correction	Global equities decline 20%; bonds flat	-\$76,900
Rate shock	Bond prices decline 7%; equities flat	-\$8,500
USD strength	International equities decline 12%; US flat	-\$11,400
Balanced recession	Equities -22%, bonds +4%, cash stable	-\$77,200
Strong recovery	Equities +15%, bonds +2%, REITs +10%	+\$59,800

Recommended next actions

1. Rebalance toward target by trimming approximately \$21,000 from US equities and adding to intermediate bonds.
2. Keep at least \$25,000 in emergency cash outside the portfolio before increasing alternative investments.
3. Review taxable-lot impact before selling appreciated ETF positions.
4. Consider whether the current 73% equity exposure is aligned with a 7-10 year investment horizon.
5. Use this document as a test corpus for agentic PDF analysis, including retrieval, table extraction, numeric reasoning, and risk-summary generation.
